

Muskegon Community College
CIS170-F01 Online and CIS170-F02 Hybrid
RPG Programming
Fall 2020

Instructor: Char Parker	<i>Online Office Hours:</i>
Office: Online	Monday: 2:15-4:15
Phone: 231.777.0523 (voice mail)	Tuesday: 2:30-4:00
Email: char.parker@muskegoncc.edu	Wednesday: 2:15- 4:15
	Thursday: 12:00- 3:00
	Friday: 10:00-11:30
	<i>Some office hours may be impacted by committee meetings, this will be indicated in Blackboard.</i>

Course Description

This course covers fundamentals of designing and developing computer programs written using the RPG ILE programming language. Topics include program logic, arithmetic operations, decision-making structures, external input and output definitions, sequential processing of batch files, and an introduction to interactive programming. Students design, write, test and document RPG ILE programs within the IBM i operating environment.

Course Objectives

- Program development tools – PDM/SEU, RDi
- Externally described input and output – DDS
- Free form File and Definition specs
- Free form Calc/Logic specs
 - Arithmetic
 - Processing character data
 - Processing dates
 - Decision-making and subroutines
- Random file processing
- Introduction to RDi Screen Designer
- Introduction to interactive applications
- Fixed vs. Free
 - Program-described input and output

Prerequisite

CIS 121 (or taken as co-requisite with instructor permission)

Materials Required

Textbooks: Programming in ILE RPG, Meyers and Buck, 5th Edition. This is an IBM Academic Initiative Program approved text.

IBM i Access

Students in this course will be given instructions on how to remotely access the IBM i host.

Course Format

This course is available in a fully online format or in a hybrid format. In the hybrid format, you have online help sessions, using Zoom, with your instructor each week to work on assignments. Hybrid students are expected to go through all the course materials via the Blackboard site, including lecture materials. The online help Zoom session is for help with questions on the lecture materials, and help on assignments; questions on the lecture material are welcomed, however, the lecture will not be repeated in its entirety. Online students are welcome to attend the online help Zoom sessions. This session is on Thursday afternoons from 3:15-4:35pm.

Participation

- Taking part in an online course requires a great deal of self-discipline and self-motivation.
- Active participation in the course is required for successful completion.
- Long periods of inactivity in the course will likely result in a disappointing experience.
- Communication is very important!
- It is the student's responsibility to drop this class if they no longer participate. Even though the instructor reserves the right to drop students for non-participation, it should not be assumed that the instructor will drop a student.
- Students that stop participating and/or fall several assignments behind may be dropped by the instructor.

Statement on Student Behavior

Muskegon Community College is a community of scholars whose members include administrators, faculty, staff, and students. Mutual respect and civility are expected in the classroom or other college academic settings, as well as, in any communication.

- MCC has the duty of providing students with privileges, opportunities, and protections that best promote learning.
- Students have the right to a non-threatening learning environment.
- Students have the responsibility to refrain from infringing on the right of others to learn or the right of teachers to teach.
- Any student whose behavior disrupts learning may be subject to disciplinary action as outlined in the Muskegon Community College Catalog.
- MCC has a Behavioral Intervention Team whose responsibility is to identify and coordinate services or intervention strategies for a broad range of troubling student behaviors, including but not limited to substance abuse, mental illness, disruptive, aggressive, and threatening conduct. MCC administrators, faculty, staff, and students are encouraged to report any issues of concern to the BIT team through the MCC website: [Behavioral Intervention Team](#)

Statement on Campus Safety

Muskegon Community College's goal is to make decisions about course delivery methods and availability of on-campus services with your health and safety as our most important priority. Because we cannot predict what the future will be, we need everyone to recognize that course delivery methods and locations may change during the semester in response to changes during this pandemic. We will remain flexible and adjust to the situation as needed. Muskegon Community College will comply and enforce the Michigan state mandates regarding wearing

masks. At all times, everyone on campus is required to wear a mask that covers their nose and mouth. Anyone not in compliance will be asked to put on a mask or to leave the campus or classroom. Be safe, be considerate of others and please respect your instructors as they enforce this mandate. If you need assistance email mcccareteam@muskegoncc.edu or call (231)773-9131.

Academic Integrity Policy

Muskegon Community College expects that all faculty and students will adhere to high standards of personal and academic honesty. This means that all academic work will be done by the student to whom it is assigned without unauthorized aid of any kind. Faculty members, for their part, will exercise care in the planning and supervision of academic work so that honest effort will be positively encouraged.

Academic dishonesty consists of, but is not limited to:

- Cheating. Cheating is defined as using or attempting to use, giving or attempting to give, and obtaining or attempting to obtain, materials or information, including computer material pertaining to a quiz, examination, or other work that a student is expected to do alone.
- Plagiarism. Plagiarism is defined as the use of another's words or ideas without acknowledgement.
- Penalties for violation of these standards of conduct may result in sanctions of up to and including suspension or expulsion from MCC.

In this class, cheating will result in all the involved students receiving a failing grade on the quiz, test, or assignment and may also result in expulsion from the class with a failing grade for the course.

Statement on Dispute Resolution Process for Academic Integrity Policy

Should a student not agree with a faculty member's decision or actions as they may relate to this policy, the following steps shall be followed:

1. A student suspected of academic dishonesty shall be notified in writing within two school days of the time the violation is discovered. Copies of the written notification shall also be filed with the department chair and Vice President of Student Services.
2. The student should try to reach resolution of the matter through direct discussion with the involved faculty member within three (3) school days of the written notification.
3. If the matter is not resolved in Step 2, the student shall bring the matter to the attention of the department chairperson of the involved faculty member.
4. If the matter is not resolved at the department chairperson level, the student shall bring the matter to the attention of the Vice President for Academic Affairs who shall render a decision within five school days of the receipt of the dispute information.
5. If a satisfactory solution is not reached at the Step 4 level, the student may file a written request with the Vice President of Student Services for a hearing before the disciplinary board. This meeting shall be held not more than 20 days following the written request. A student may request a hearing before the disciplinary board. The disciplinary and judicial procedures are outlined in the Muskegon Community College Catalog.

Statement on Student Assessment and Accreditation

Muskegon Community College is fully accredited by the Higher Learning Commission. The Higher Learning Commission accredits degree granting postsecondary educational institutions in the

North Central Region. Accreditation helps ensure students that they are receiving a quality education and can transfer to other colleges and universities with ease and confidence. MCC is committed to an essential part of the accreditation process: assessing student learning. You will likely be asked to participate in assessment activities as part of MCC's assessment of programs and general education.

Statement on Disability Support

If you are a student with a disability and believe you will need accommodations for this class, it is your responsibility to register with Disability Support Services and provide them with documentation of your disability. They will work with you to determine what accommodations are appropriate for your situation. To avoid any delays please contact Disability Support Services in room 204 or at: (231) 777-0309. Please note that accommodations are not retroactive and cannot be provided until a student has registered with our office.

Email Policy

Students are required to use their MCC email accounts throughout the course, including insuring that the inbox has sufficient space to accept incoming messages from the instructor. The instructor will ALWAYS use your MCC email address when writing to the class or to individuals. ALL EMAILS sent to the instructor need to include your course number, and any other information needed in the Subject Line. For example "CIS170 Project 1" or "CIS170 Question on Homework 1."

Discussion Board

Please post questions on the discussion board that may be of general interest to the entire group. Often, another student has encountered that same situation, and posting it on the discussion board is a great way to help everyone out. The instructor will regularly monitor the *Discussion Board* and post responses as appropriate. If you have a question that you do not want to share with the group, or seems too specific to be helpful to the whole group, feel free to email or message the instructor.

Interaction with Instructor

Students may email the instructor for help. In addition to email, when asking for help, other communication tools, such as Zoom and perhaps other tools, will be used. Your instructor might also leave messages on the IBM i for you. Feedback on your work will be provided via the Blackboard gradebook and this will usually include comments which are denoted by a "word bubble" icon in the gradebook. Every week, there will also be a "Course Update" email that should be reviewed.

Course Agenda

All of the due dates are posted on the Course Agenda, found under "Course Documents" on the Blackboard site. Students should print and refer to this Course Agenda often. It is your primary guide to completing the course.

Course Materials

It is vital to review all course materials related to a unit. There are PowerPoint presentations, handouts, and videos throughout the materials. Keep in mind that these materials take the place of a "live" session and are very important.

Grading Criteria

Programming Projects: Each programming project addresses important course topics. Projects are evaluated based on adherence to specs, functionality, accuracy of output, appearance of output, structure, and documentation. One late project will be accepted without penalty. Further late labs are marked down as follows:

- Projects submitted within a week of the due date will have a *maximum* point value of a “B” (85% of potential points; after evaluation, score is reduced by 15%)
- Projects submitted more than one week late will have a *maximum* point value of a “C” (75% of potential points; after evaluation, score is reduced by 25%)

Homework: These assignments will consist of a combination of Chapter Review Questions, Exercises, and instructor handouts. Late homework will be marked down in the same manner as programming projects.

Tests:

During completion of this course, each student will be required to take two tests. During Fall of 2020, these tests will be conducted online. Details will be emailed to you as each date approaches.

Points and Grading

Points are accumulated throughout the semester as shown below: Grades can be checked via the Blackboard site by clicking the “Tools and Grades” link, and then clicking “My Grades.”

Programming Projects	600
Homework	200
On-Campus Tests (Mid-Semester and Final)	200
<i>Total Points Possible:</i>	<i>1000</i>

Grading Scale: the accumulated point total is divided by 1000 to obtain a percentage, which is then assigned a letter grade as shown:

A	93 – 100%	B+	87 – 89%	C+	77 – 79%	D+	67 – 69%	E	59% or below
A-	90 - 92%	B	83 – 86%	C	73 – 76%	D	63 – 66%		
		B-	80 – 82%	C-	70 – 72%	D-	60 – 62%		

Strategies for Success

- Participate regularly!
- Read the textbook. Read the chapters that are to be covered *prior* to reviewing class notes, etc.
- Follow the timelines as posted on the Course Agenda.
- Form an alliance with a few fellow students for studying and quizzing each other. Use the discussion board to post questions and comments that you think might be of interest to the class.
