# Project #3 Instructions
# 10/21/26
# Chris Grimm

**Assignment Instructions**

**It is recommended that you do *NOT* start the projects until you have read your weekly textbook assignment and review associated materials.**

**It is critical that you complete all assignments. They build on each other from week to week.**

**Week 3 - Part 1 Project:**

**Last week's project Part 1 included the creation of a simple homework home page that is directly accessible by clicking on your name on the student server home page.**

**Add the following features to your homework home page:**

- **Place some content (either current content or new content) in a box with a transparent colored background and some type of rounded or specially formatted borders as described on pages 185 - 188 of your textbook. You can reference the Transparency.html and RoundedBorders.html files within your Chapter 06 datafiles for ideas.**
- **Add at least one other box with a radial or linear gradient on the page. This information is covered on pages 191 - 195 of your textbook and within the Gradients.html file in your Chapter 06 data files.**
- **Apply Google Fonts to some of the content on your page as described on pages 214 - 216 of your textbook.**

**Once you have completed this portion of the assignment, submit the link using the submit button below.**

**Live URL: http://157.245.246.41:8014/index.html**

**Sources:**

**http://157.245.246.41:8014/index.html**

**http://157.245.246.41:8014/style.css**
