Project #13 Instructions
11/12/26
Chris Grimm

Assignment Instructions

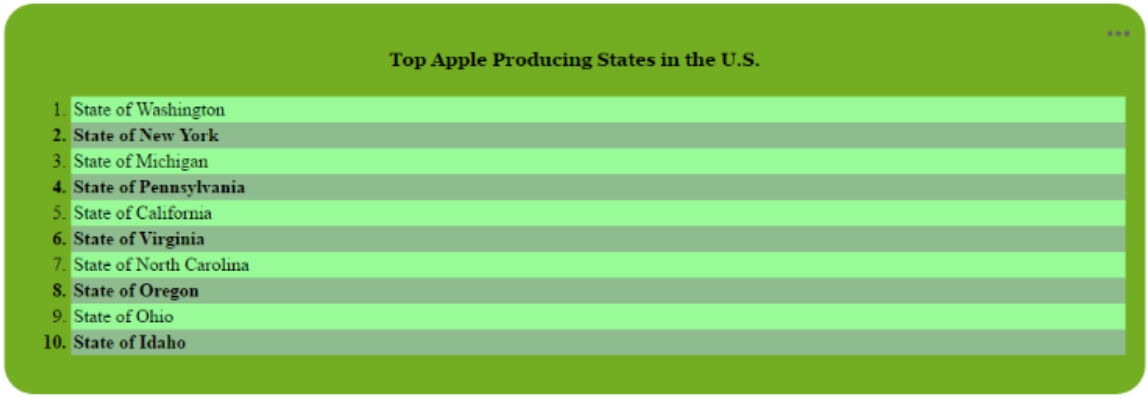

It is recommended that you do not begin the project until you have completed the weekly reading and reviewed the related materials.

Use the following code and make the adjustments described below.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <title>Top Apple Producing States</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <div class="container">
    <div class="row">
      <h4>Top Apple Producing States in the U.S.</h4>
      <ol>
        <li>Washington</li><li>New York</li><li>Michigan</li>
        <li>Pennsylvania</li><li>California</li><li>Virginia</li>
        <li>North Carolina</li><li>Oregon</li><li>Ohio</li><li>Idaho</li>
      </ol>
    </div>
  </div>
</body>
</html>
```

You may not alter the HTML code to meet the requirements. All changes must be made using a style.css stylesheet, which you will need to create.

Your page should look something like this (colors and shapes can vary):

Here's what you need to complete:

- **Change the text style.**
- **Center the headline.**
- **Add the phrase "State of " to the beginning of each state name.**
- **Make every other state in the list bold.**
- **Alternate background colors for each line (one color for even lines, another for odd lines).**
- **Add a colored border around all content.**
- **Ensure the HTML file validates at 100%.**
- **Use FOUR media rules to change the background color of alternating lines at four different screen sizes (1000, 900, 800, and 700 max-width). A short video showing how the color change should work can be found here: https://www.youtube.com/watch?v=WZZfjIbKf28.**
- **Add at least TWO additional enhancements using a CSS selector or rule not previously used.**

When finished, submit the URL of your HTML page on the student server and include a short summary of the two additional enhancements you added.

Source:

index.html, style.css

Live URL: http://157.245.246.41:8014/Project13/index.html

Enhancements Summary:

1. I applied a box-shadow rule to the .container class to give the bordered content area a subtle 3D drop-shadow effect against the white background.
2. Based on the More CSS Selectors reading. I utilized the adjacent sibling combinator "+" to specifically target the order list only when it directly follows the h4 headline, applying a toper margin to create clean vertical spacing between the title and the list elements.

Front End:

Top Apple Producing States in the U.S.

1. State of Washington
2. **State of New York**
3. State of Michigan
4. **State of Pennsylvania**
5. State of California
6. **State of Virginia**
7. State of North Carolina
8. **State of Oregon**
9. State of Ohio
10. **State of Idaho**
