

Java Objects Assignment
Chris Grimm
9/30/24

Prompt: Using the Java Objects Example Archive File attached in this week's module, Create a new Class named Boat that inherits from Vehicle. Create an interface for the boat class similar to the interface definitions for Car and Truck. Create a few subclasses of Boat that inherits from the class Boat (hint: SpeedBoat, SailBoat, Submarine are some examples - there are many other types of boats out there).
